THE ANNALS INDEX VOLUME 34

Honggen Xiao
University of Waterloo, Canada

This volume contains 50 full-length articles, 7 research notes, and 32 book reviews, with a total of 142 author appearances. The addition of these contributions to the cumulative subject index (available at <www.elsevier.com/locate/annals>) expands the overall knowledge landscape of *Annals*. Substantively, two headwords are introduced into the comprehensive list of research subjects: Evaluation and Mobility. Also included as new entries of country/place names are Cambodia, Slovenia, and the Balearic Islands of Spain. The expansions of research on existing subjects are reflected in several new subcategories. "Market" now has a new subcategory of "visiting friends and relatives"; "Network" has one of "knowledge"; "Organization and Association" now includes "World Bank"; "Social" includes "network"; and "Theory" has been given the new subcategories of "actor-network" and "utilization".
